

“I Wonder About...”

I wonder about the future of
the consumers desiring food.
I wonder about our future children
fighting and quarreling over a million\$.
I wonder about the ecosystem
losing its momentum
because of humans.
I wonder about the children
in poverty...finally living
in a property.

I wonder on how our ancestors
discovered the wheel
to invent the snowmobile.
I wonder how they also
discovered math
and then created blueprints
for birdbaths.
I wonder how the pyramids were built
with capstones shiny and guilty for all
the sweat spilled.
I wonder how the successful Archimedes
discovered professions for the needy.
I wonder how Michu Suzuki
came up with songs
for beauty.
